Global furniture company Mark David, together with international interior architectural design firm, Wilson Associates and Feng Shui Consultant, SynerCh'i LLC, introduce a hospitality furniture line titled Prosperity. Collaboratively designed and constructed, the line follows the principles of feng shui.

The three design partners envision that, once integrated into any interior space, the collection will create a balanced and harmonious environment. The practice of feng shui is increasingly becoming a part of the design process today. Prosperity was designed to meet this need. The line composed of stand-alone pieces as well as pieces that work together reveals an aesthetic of a relaxing retreat.

The inspiration behind the conceptual design was derived from the five elements - wood, fire, earth, metal & water. As the elements and ch'i (energy) interact it achieves feng shui balance. The subtle combination of the elements to each piece in the collection, by way of color, shape and materials will introduce symmetry when installed into a space.

Create a more balanced environment to the design of your next destination.
